Academic Projects

National Identification System (NID)

An application that will allow citizens/user to login to the system either with thumb verification (desktop based application) or web login with username and password. It is similar to electronic citizenship card with

web and thumb verification so that citizens can update their academic or any other individual information. When user goes to any interview or any other places to open bank account the only need to give their National ID. This is suffice to check his/her information over internet.

Online Library using Java Server Page

A web based application that will allow user to login to the system with valid username and password. Once use are logged in they can search for the books they are looking for and make online booking if they want to get it from there. Even they can read it online however they cannot download them. They can also check if the books are available in the library or not.

Banking System using VB. Net as Minor Project

A desktop based mini banking system with transaction record and account creating application that is similar to banking software. This application records data of customer and as well as some basic accounting of user regarding banking facility. Users are general customer and banking staffs. Banking staff can create the customer records with provided details, as well as can do basic debit/credit accounting related to those customer.

Graphical Telephone diary with Calendar in C language

A desktop based application built in C++ programming language. This user friendly application is capable to store, delete, update telephone information and search for telephone numbers. The application uses notepad as the database and stores all information on TAB separation.

Graphical Eight Queen Puzzle in C language

A game to check ability of putting eight queens of chess on an 8x8 chessboard so that none of them captures any other using the standard legal chess movement. This application is built in C programming language with lots of functions.
